— PHONE AGENT TRAINING · NIGERIA · GHANA · UGANDA · GAMBIA

Module 2

The client journey

From the first WhatsApp message to the paid compensation — and your role at every step.

Languages **English & Wolof**

Rights **EU261 + UK261**

Follows **Module 1**

Climbié

CLIMBIÉ KODJO

Founder — Robin des Airs

By the end of this module, you'll be able to 📌

1 Follow the **6 steps of the journey** and know **where you step in**.

2 Collect the **3 right documents** (ticket, boarding pass, passport) and recognise a **good photo**.

3 Check a file (**AI pre-checks, you confirm**) and ask for a re-take **politely**.

Reassure on the **mandate** (£0 / €0, 14-day withdrawal) and on **bank details**

4

(never on WhatsApp).

5

Answer the **6 most common objections** — in English and Wolof.

01 The journey map

Every file follows the same 6 steps. Spot clearly where **you** are the one who acts.

1

The client writes on WhatsApp

The bot asks the questions (flight number, route) and runs a first eligibility check. In English.

The bot

2

You call back & reassure

You take over: build trust, answer questions, unblock. In Wolof if needed (esp. Gambia).

You

3

Collect the documents

You help the client send their 3 documents (ticket, boarding pass, passport).

You + client

4

Verification & signed mandate

The AI pre-checks, the team confirms. The client signs the mandate online (£0 / €0).

Team

5

We claim from the airline

Claim sent, then follow-ups and mediation if needed. The client does nothing.

Team

6

Compensation paid

The money lands in the client's account. Time to ask for a Google review.

02 Step 1: the WhatsApp submission

Before your call, the client has already chatted with the **bot** on WhatsApp. The bot captured:

? The **flight number** → the bot proposes the **route** (departure → arrival).

? A first **eligibility check**: delay $\geq 3h$? distance? jurisdiction? within the time limit?

? If **potentially eligible** → the bot asks for the documents.

Your role here: you step in when the client **doubts, stalls or drops off**. A human call in Wolof revives a file that would have been lost. You are the **safety net** of the journey.

03 The 3 documents to collect

No documents, no file. Your job: get them — legible and complete.

The ticket / booking

Shows the **route**, the **date**, the **booking reference** and **all passengers**.

- ✓ e-ticket, airline or agency e-mail
- ✗ a blurry screenshot of a text

The boarding pass

Proves the client **actually took the flight**. The strongest proof.

- ✓ paper OR the version in the airline's app
- ✗ thrown away? → we recover it (tip below)

The passport

For **identity** and the **mandate**. Used **only** for the file, and protected.

- ✓ full photo page, sharp
- ✗ never shared publicly

A good photo: the **whole** document in frame, **well lit**, **sharp text**, laid **flat**, no finger on the text. **Avoid:** blur, cropped, glare, too dark.

"Lost boarding pass" tip: never block the client. It can often be recovered from the **airline's app** or the **check-in e-mail**. Failing that, the ticket + proof of travel can be enough — always look for a solution.

 **Bonus (care expenses):** if the client was stuck a long time and paid for **hotel, taxi or meals**, tell them to keep the **receipts** — that money comes back **on top** of the compensation, and it does **not** reduce it. (More in Module 3.)

04 Checking a file

The golden rule

The **AI pre-checks** the documents, but **a human confirms**. **Never the AI alone** on legal documents.

Before you validate, check 4 things:

 Is the **photo legible** (whole, sharp)?

 Is the **name the same** on the passport AND the ticket?

 Does the **flight** match the one announced?

 Do **all passengers** on the file have their documents?

If a document is bad: ask for a re-take — **politely**, explaining **why**. E.g.: "The photo is a bit blurry, could you re-take it flat with more light? 🙏 "

 **24h SLA both sides:** the team validates in **under 24h**, and the client re-sends a rejected document in **under 24h**. A file that moves fast is a file that pays out.

05 The mandate (the signature)

It's the authorisation that lets Robin des Aïrs **claim the compensation in the client's name** from the airline.

How to present it and reassure:

? It is **not** a commitment to pay: we do the work. **£0 / €0**.

? **Online** signature, simple, from the phone (we send the link).

? The client keeps a **14-day withdrawal right**.

🚫 **Red-line reminder (Module 1):** you give **no legal advice** on the mandate's clauses. A pointed legal question → "our team will explain it." You are **not a lawyer**.

06 Bank details

🔒 **NEVER bank details on WhatsApp.** And never before the claim is won. If anyone asks for bank details on WhatsApp, it's not us.

So when? Once the file is **accepted**, then once the **funds are received** from the airline → we ask for the bank details via a **secure link** (form), and we transfer the client's share **within 5 working days**.

The anti-scam line to say: "**We will never ask for your bank details on WhatsApp, nor for money. We are the ones who pay you.**"

07 The 6 tricky objections

Base answers — adapt with your own words. Stay **calm and clear**: an objection is just a question in disguise. (Wolof line for Gambian / Wolof-speaking clients.)

- "Too good to be true... it's a scam"

EN "It's not a scam. The money goes into **your** account, and you pay nothing whatever happens."

WO « Du arnaque. Xaalis bi ci **sa** compte lay dem, te doo fey dara lu mu mën a doon. »

- "Why do you take 25%?"

EN "The 25% is our work: we do everything for you. And if we recover nothing, you pay nothing."

WO « 25 % bi mooy sunu liggéey : nuy def yëf yépp ci sa wàll. Bu fekke jotunu dara, doo fey dara. »

- "I lost my boarding pass"

EN "No worries. We can recover it from the airline's app or your check-in e-mail."

WO « Bul jëf. Mën nanu ko wut ci appli compagnie bi walla ci email enregistrement bi. »

● "I'm worried about my passport"

EN "Your passport is used only for your file, we protect it, it is never shared publicly."

WO « Sa passeport, ci sa dossier rekk lanu koy jëfandikoo, danu koy aar, du génn ci mbedd. »

● "How long will it take?"

EN "If the airline cooperates, 2–3 months; if it resists, longer. But you do nothing — we keep you posted."

WO « Bu compagnie bi déggoo gaaw, ñaari-ñetti weer ; bu dëgëree, mën na yagg. Waaye yaw doo def dara, danu lay xamal. »

● "The airline offered me a voucher"

EN "Don't accept the voucher! You're entitled to cash, not a voucher. Leave it to us, we'll recover your compensation."

WO « Bul nangu bon d'achat bi ! Am nga droit ci xalis (cash), du bon. Bàyyil nu ko, danu lay jotat sa indemnité. »

any advance

09 Check your knowledge

Answer without looking. Then open the key.

- Q1 What are the **3 core documents** to collect?
- Q2 The client threw away their boarding pass. Do you **block** them?
- Q3 The client wants to give you their **bank details on WhatsApp**. What do you do?
- Q4 The AI shows "file OK." Do you validate **straight away** ?
- Q5 The name on the **passport** $\neq$ the name on the **ticket**. A problem?
- Q6 The airline offers a **£520 voucher**. Should the client accept?
- Q7 How long does the client have to **re-send** a rejected document?
- Q8 The client has a **withdrawal** right of how many days?

▼ Show the answer key

1. The **ticket/booking**, the **boarding pass**, the **passport**.
2. **No, never**. Look for a solution (airline app, check-in e-mail) — it's often recoverable.
3. **Never** collect bank details on WhatsApp. Explain we'll ask later, via a **secure link**, after the win.
4. **No** — the AI pre-checks, but a **human** always confirms.
5. **Yes, to check** (typo? maiden name?). The name must match before going further.
6. **No** — they're entitled to **cash**; a voucher can make them lose their compensation. We handle it.
7. **Under 24h** (SLA both sides).
8. **14 days**.

► NEXT STEP

Module 3 — Tracking, follow-ups & payment

How to track a file, when and how to follow up, the "paid" stage, and getting a Google review at the right moment.
